ELECTRIC LOGGING FOR DENSITY. [1961] [10]p.

Order from OTS or SLA \$1.10 61-27256

Trans. of Voprosy Rudnoi Geofiziki (USSR) 1957, v. 1,
p. 62-66.

DESCRIPTORS: *Well logging, *Geophysical prospect-
ing, *Rock, Density.

A new method of geophysical exploration in boreholes
is briefly described, electric logging to determine the
density of rock, initially suggested by M. M. Sokolov
and developed under his guidance by the author with the
assistance of N. I. Karabanov. The method is based
on the existence of a definite relationship between the
scattering of gamma radiation and the density of rocks.

DESCRIPTORS: *Quantum mechanics, *Particles,

We conceived and sketched out this monograph in 1955
 as a detailed exposition--resembling in style more a
 textbook than a scientific paper--of the methods of
 dispersion relations, and the closely related questions
 of the spectral representation of Green's functions. In
 particular, the central point--the proof of the exist-
 ence of dispersion relations for the scattering of
 π -mesons on nucleons--was announced by one of us
 (N.N.E.) at an international conference in Seattle, in
 September 1956. (Author)

Trans. of mono. Voprosy Teploobmena (Problems of
 Heat Exchange) Moscow, 1959, p. 193-199.

DESCRIPTORS: *Heat transfer, *Thermocouples, Wire,
 Thermoelectricity, Arc welding, Heat resistant alloys,
 Electric insulation, Welding.

Information is presented on (1) a method of welding fine
 thermocouples by means of an arc formed by the dis-
 charge of a bank of condensers between metal foil and
 the thermoelectrode, (2) the technology for manufac-
 turing micro-thermocouples and cementing them to heat
 exchange surfaces, and (3) the technology for applying
 heat resistant electric insulation to thermoelectrode
 wires.
